

Solution

1 minute

The following code is one possible solution for the challenge from the previous unit.

C#	 Copy	 Run
<pre>Console.WriteLine("This is the first line."); Console.Write("This is "); Console.Write("the second "); Console.Write("line.");</pre>		

This code is merely "*one possible solution*" because we didn't specify which technique to apply to which line of output. However, you should have used both the `Console.WriteLine()` and `Console.Write()` methods to produce the desired output.

Output	 Copy
<pre>This is the first line. This is the second line.</pre>	

If you were successful, congratulations! Continue to the knowledge check in the next unit.

Important

If you had trouble completing this challenge, maybe you should review the previous units before you continue. All new ideas we describe in other modules will depend on your understanding of the ideas that were presented in this module.

Next unit: Knowledge Check

.NET Editor

Press CTRL + M, TAB to exit the editor

 Clear

 Run

```
1 Console.WriteLine("This is the first l:
2 Console.Write("This is ");
3 Console.Write("the second line.");
4
```

Output 

This is the first line.
This is the second line.
